▍Simple Analytics

Embed script v10

This is a tiny update with only 2 changes.

- We fixed a bug where the [callback didn't trigger in `sa_event`](#) when metadata was specified.
- We allow for `sa_settings` to communicate settings to the script from JavaScript directly. Created for [our official Google Tag Manager tag](#).

If you are a developer you might want to see [what changed](#) in our open-source repository.
