Framework plugins

For most frameworks, you can include the script. We magically track page views, so you don't have to change your app code. [Read on how we do that](#). For some, we got requests to create a plugin for them.

```
{% assign currentDate = 'now' | date: '%s' | plus: 0 %}
{% assign threeMonthsLater = '2023-02-07' | date: '%s' | plus: 7884000 %} {# 7884000 is
approximately the number of seconds in 3 months #}
```
