Filters

How can we make it easy to find that data about that specific page/referrer/UTM code? Well, we created filters just for that. With a few clicks, you will find the data you are looking for.

```
{%  
include video.html  
slug="filters"  
formats="mp4,ogg,webm,wmv"  
poster="video.png"  
%}
```

Go to [your dashboard](#) and start playing with filters.
