

Simple Analytics

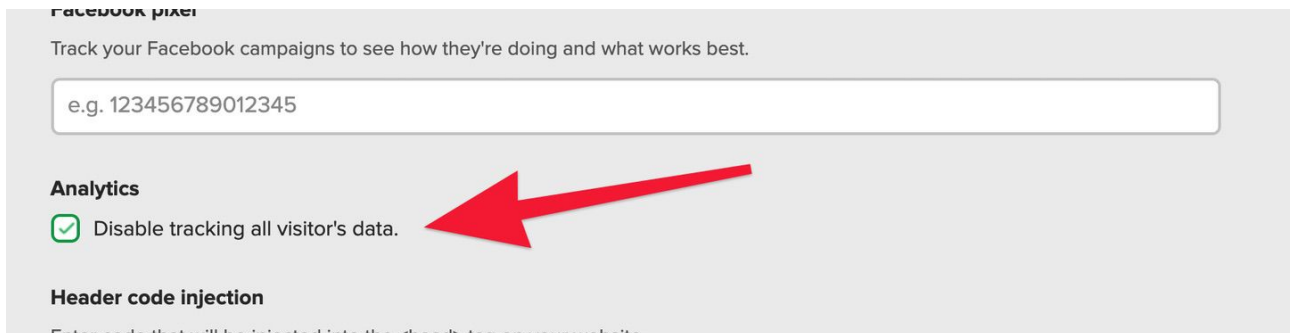

This pdf is generated on March 28, 2024. Go to [the documentation page](#) for the most up-to-date version.

Install Simple Analytics on MailerLite

You can embed our script in MailerLite using their feature called "Page code injection". On this page we will explain how to use this feature and help you installing the Simple Analytics script on MailerLite.

Follow these steps to add Simple Analytics to your website:

1. Go to your website settings by navigating from **Sites** > **Websites** > (click the name of your website) > Scroll to **Website settings** > **Edit**
2. We recommend to disable the other analytics tools (for privacy reasons) if you don't use those. It does not disable Simple Analytics. Check the box:

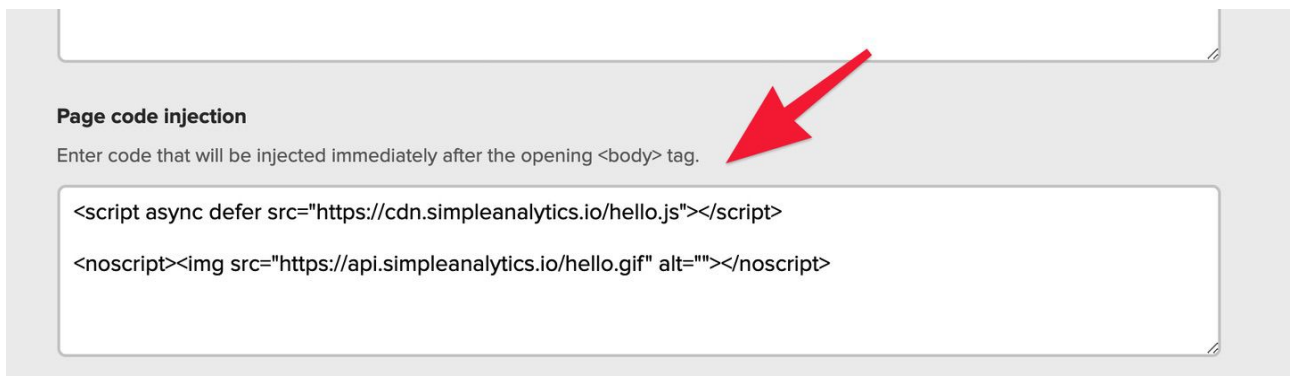

Facebook pixel
Track your Facebook campaigns to see how they're doing and what works best.

Analytics
☒ Disable tracking all visitor's data.

Header code injection
Enter code that will be injected into the <head> tag on your website.

3. Paste the embed code from [how to add our script](#) into the **Page code injection** text input field:

Page code injection
Enter code that will be injected immediately after the opening <body> tag.

`<script async defer src="https://cdn.simpleanalytics.io/hello.js"></script>`
`<noscript></noscript>`

4. Click on **Save and continue** and you are done

Save and continue

or [Cancel](#)

If you encounter issues, don't hesitate to contact us via [our support channels](#).
