

Simple Analytics

This pdf is generated on April 27, 2024. Go to [the documentation page](#) for the most up-to-date version.

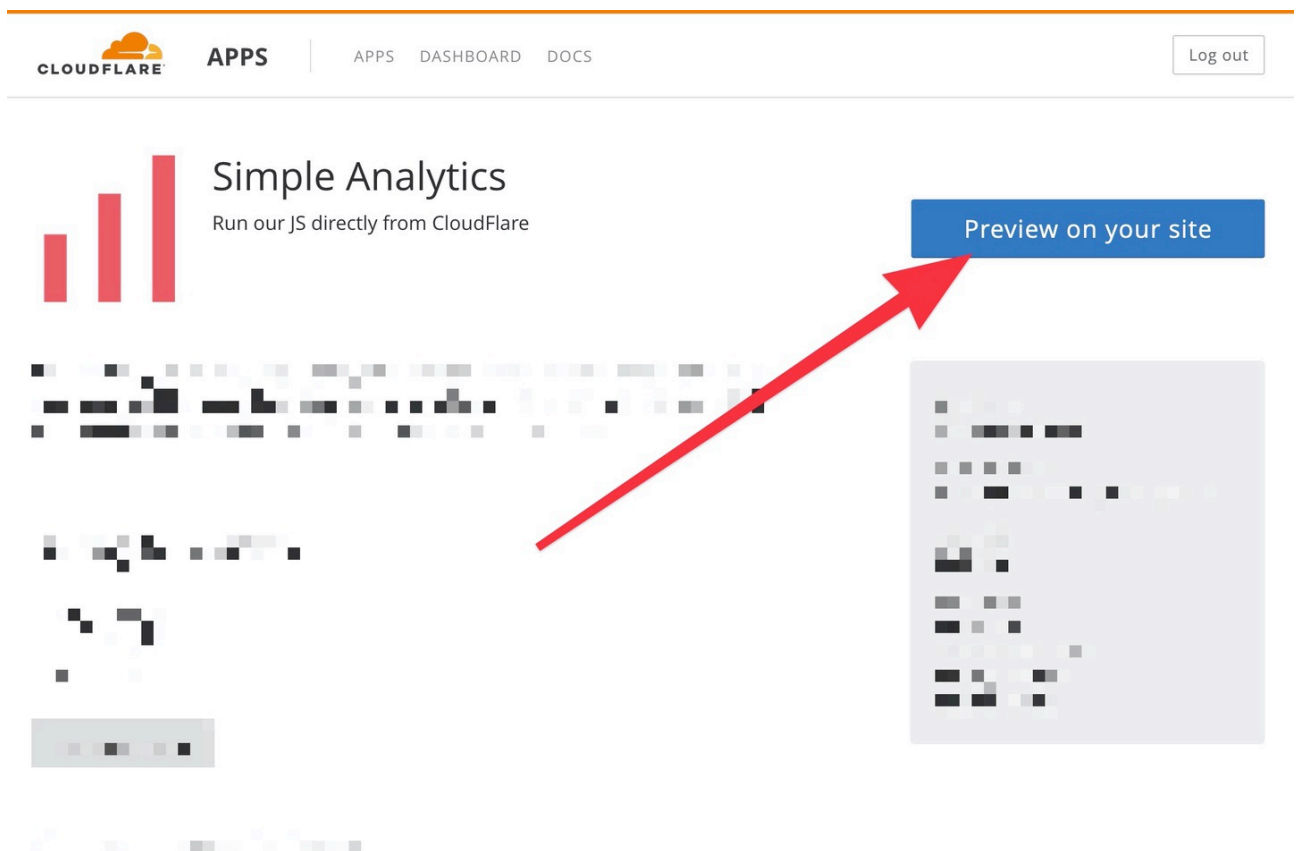

Install Simple Analytics on Cloudflare

You can embed our script in Cloudflare using [Cloudflare Apps](#). On this page we will explain how to use this feature and help you installing the Simple Analytics app on Cloudflare.

This CloudFlare app does not install [the custom domain](#) for you. You need to add it yourself if you want to use it.

Follow these steps to add Simple Analytics to your website:

1. Go to the [Simple Analytics app on Cloudflare](#)
2. Make sure you are logged in
3. Click on **Preview on your site:**

4. You can customize some settings like [recording DNT users](#), a [custom domain](#), [track events](#), or enabling [hash navigation](#). Once you're done click the button **Finish installing onto your site:**

Cloudflare APPS | APPS DASHBOARD DOCS Log out

< EXPLORE APPS

Preview Simple Analytics

Custom domain
If you have a custom subdomain you can fill it in here, leave blank otherwise.

cdn.simpleanalytics.io

☐ Record DNT users
Record page views also when DNT is enabled. DNT is to prevent tracking so we don't send events for those visits, but you can enable recording page views.

☐ Track events
Select this if you want to track events with Simple Analytics. Otherwise we don't include the extra code.

☐ Website uses hash navigation
Check this box when you website uses hashtags (#) for navigation (for example carrd.co websites). If you don't know what this means, leave the box unchecked.

You're previewing Simple Analytics 1.0.2 by Simple Analytics.
