Install Simple Analytics on Cloudflare

You can embed our script in Cloudflare using [Cloudflare Apps](#). On this page we will explain how to use this feature and help you installing the Simple Analytics app on Cloudflare.

Follow these steps to add Simple Analytics to your website:

1. Go to the [Simple Analytics app on Cloudflare](#)
2. Make sure you are logged in
3. Click on **Preview on your site:**

4. You can customize some settings like [recording DNT users](#), a [custom domain](#), [track events](#), or enabling [hash navigation](#). Once you're done click the button **Finish installing onto your site:**

Cloudflare APPS | APPS DASHBOARD DOCS | Log out

< EXPLORE APPS

Preview Simple Analytics

Custom domain
If you have a custom subdomain you can fill it in here, leave blank otherwise.

Record DNT users
Record page views also when DNT is enabled. DNT is to prevent tracking so we don't send events for those visits, but you can enable recording page views.

Track events
Select this if you want to track events with Simple Analytics. Otherwise we don't include the extra code.

Website uses hash navigation
Check this box when you website uses hashtags (#) for navigation (for example carrd.co websites). If you don't know what this means, leave the box unchecked.

You're previewing Simple Analytics 1.0.2 by Simple Analytics.

6. Next click on **Install on all pages**:

The screenshot shows the Cloudflare dashboard for a domain named 'example.com'. The main heading is 'Install Simple Analytics on All pages'. Under 'Custom domain', the text reads: 'If you have a custom subdomain you can fill it in here, leave blank otherwise.' Below this is a text input field containing 'cdn.simpleanalytics.io'. There are three unchecked checkboxes: 'Record DNT users', 'Track events', and 'Website uses hash navigation'. At the bottom of the configuration panel, there is a green button labeled 'Install on all pages'. A red arrow points from the 'More information...' link in the preview pane to the 'Install on all pages' button.

7. Next click on **Continue** (we don't use your email):

The screenshot shows the same Cloudflare dashboard as above, but with a 'Review permissions for this app' dialog box overlaid. The dialog title is 'Review permissions for this app' and it states 'this app has requested the following permissions:'. Under the heading 'Email', it says 'Cloudflare will share your email address (cloudflare@example.com) with the developers of this app,'. At the bottom of the dialog are two buttons: 'Cancel' and 'Continue >'. A red arrow points from the 'Continue >' button in the dialog to the 'Continue >' button in the dialog.

8. On the next page you will see the Simple Analytics app installed:

-  Overview
