

Simple Analytics

This pdf is generated on April 15, 2021. Go to [the documentation page](#) for the most up-to-date version.

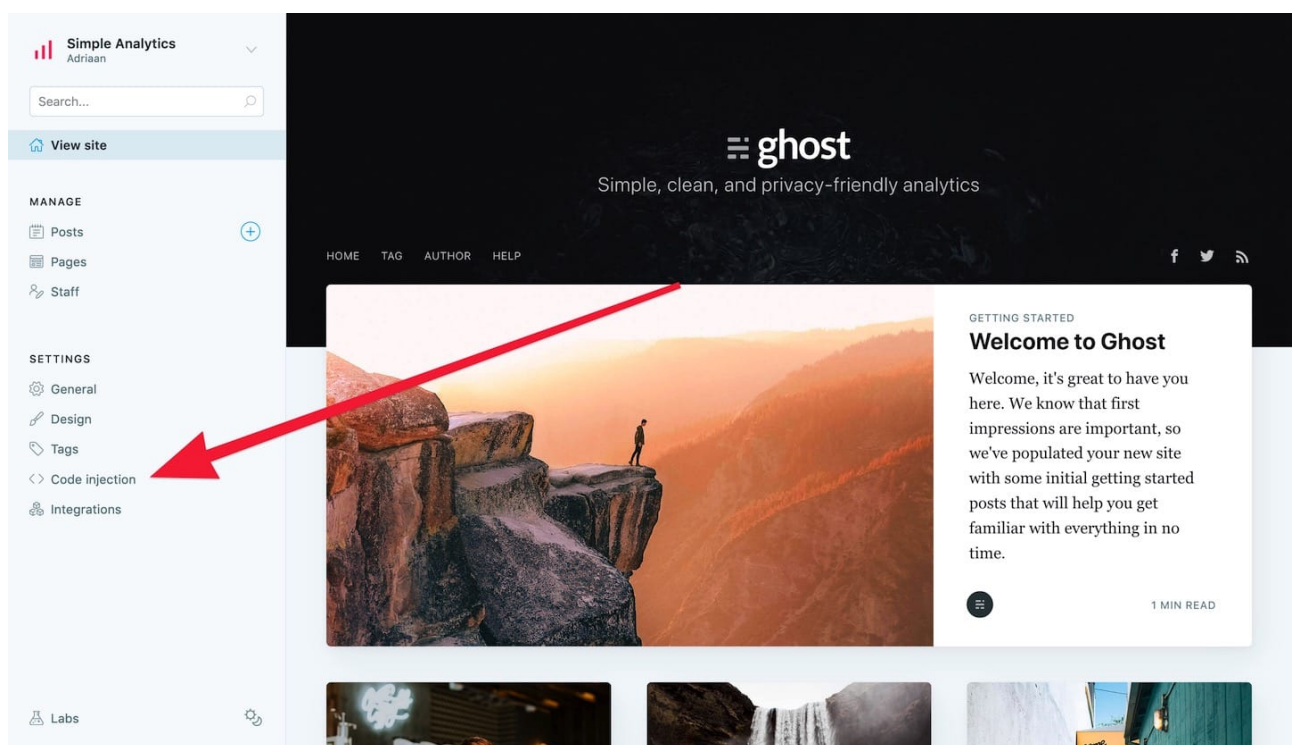

Install Simple Analytics on Ghost

You can embed our script in Ghost using their feature called "Code Injection". On this page we will explain how to use this feature and help you installing the Simple Analytics script on Ghost.

Ghost uses caching for its websites. Sometimes it can take a few minutes before the script is actually added.

Follow these steps to add Simple Analytics to your website:

1. Go to your Ghost Admin settings
2. Next click on **Code Injection** in the sidebar menu:

3. Paste the embed code from [how to add our script](#) into the **Site Footer** text input field:

Simple Analytics

Code injection

Ghost allows you to inject code into the top and bottom of your theme files without editing them. This allows for quick modifications to insert useful things like tracking codes and meta tags.

Site Header
Code here will be injected into the `{{ghost_head}}` tag on every page of the site

```
1
```

Site Footer
Code here will be injected into the `{{ghost_foot}}` tag on every page of the site

```
1 <script async defer src="https://cdn.simpleanalytics.io/hello.js"></scrip
2 <noscript></no
```

Save

4. Click on **Save** and you are done:
