Use website data in Can I Use

If you were a developer you know the website caniuse.com. Can I use provides up-to-date browser support tables for support of front-end web technologies on desktop and mobile web browsers. It's super useful when you develop features for your visitors.

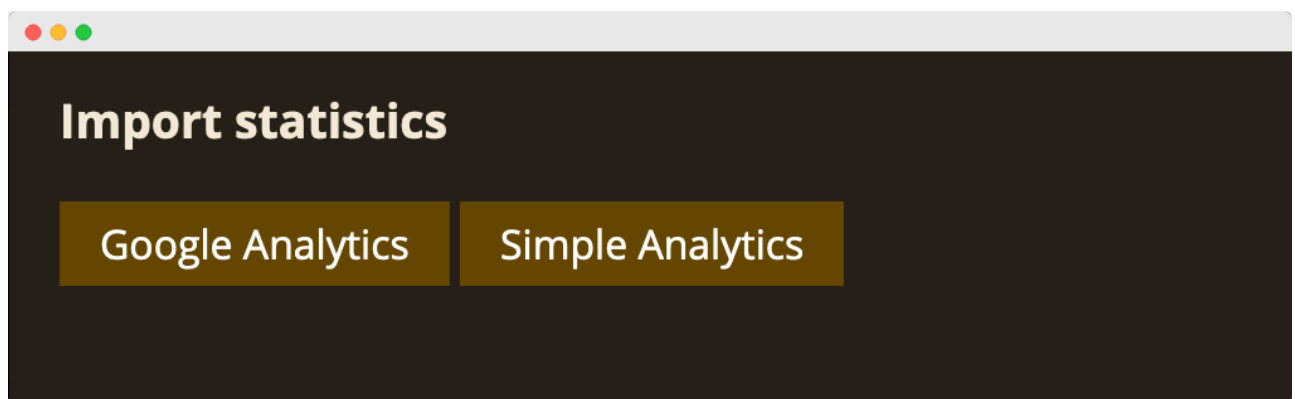

We don't support the export format required by Can I Use anymore.

Can I use shows percentages of support of features you can use in the browser. Let's say you develop a new feature and you want to know how many of your visitors support Flexbox. You would [search for Flexbox](#) and find out the percentage of visitors around the world who support Flexbox. But, this does not say much about **your** visitors.

That's where the Simple Analytics integrations comes in. Want to try it?

First you need to export your website data:

1. Replace `example.com` with your website name in this URL:
`https://simpleanalytics.com/example.com.json?version=1`
2. Go to that URL
3. Save the output as a .json file, `caniuse.json` for example
4. Go to [caniuse.com/ciu/import](#)
5. You will see this screen:

6. Click "Simple Analytics"

7. Select the json file:

Import statistics

Use this form to import visitor statistics from your Simple Analytics account(s).

File: caniuse.json

Name:

8. Click "Import"

9. You will see a list of browser that are imported:

Import statistics

The imported information is now displayed in the upper-right corner for each feature table.

Browser statistics are stored in your browser for future use.

Import details

Total imported: 99.03%

Total untracked: 0.97%

Browsers included		Browsers not included	
Chrome 96	37.87%	Yandex Browser 21 (macOS)	0.82%
Safari 15	17.98%	Samsung Internet 16 (Android)	0.14%
Safari & Chrome for iOS 15.0-15.1	9.75%		
Chrome 96 for Android	7.45%		
Safari & Chrome for iOS 15.2	6.15%		
Firefox 95	2.44%		
Chrome 95	2.18%		

10. When searching for features, you will see your own visitors support:

Can I use

flexbox

? ⚙ Settings

3 results found

CSS Flexible Box Layout Module  - CR

Method of positioning elements in horizontal or vertical stacks. Support includes all properties prefixed with `flex`, as well as `display: flex`, `display: inline-flex`, `align-content`, `align-items`, `align-self`, `justify-content` and `order`.

Usage

% of

all users

 ?

• simpleanalytics.com

98.95% + 0.08% = 99.03%

unprefixed: 98.95% + 0.08% = 99.03%

Global

98.43% + 1.17% = 99.6%

unprefixed: 98.32% + 0.72% = 99.04%
