

Simple Analytics

This pdf is generated on May 9, 2021. Go to [the documentation page](#) for the most up-to-date version.

Admin API

Use this if you want to administer your account.

With this API you can do a few things, for example add websites to your dashboard. This API is only available on request because we want to know what the use case for the API will be. Just drop us a line via [our contact page](#).

List websites

```
GET https://simpleanalytics.com/api/websites
```

The only Admin API endpoint that is available for all plans.

```
curl "https://simpleanalytics.com/api/websites" \ -H 'Content-Type: application/json' \ -H 'Api-Key: sa_api_key_XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX' \ -H 'User-Id: sa_user_id_00000000-0000-0000-0000-000000000000'
```

Your user ID and API key are shown in [your account settings](#).

Add a website

```
POST https://simpleanalytics.com/api/websites/add
```

For this endpoint you will need a Business plan. You can specify a time zone via `timezone` and set the website to public or private via the `public` boolean. [See wikipedia](#) for a list of valid time zones. If you don't specify a time zone we will set it to UTC.

```
curl -X "POST" "http://localhost:3000/api/websites/add" \ -H 'Content-Type: application/json' \ -H 'Api-Key: sa_api_key_XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX' \ -H 'User-Id: sa_user_id_00000000-0000-0000-0000-000000000000' \ -d '${ "public": false, "hostname": "example.com", "timezone": "Europe/Amsterdam" }'
```

Custom endpoints

For bigger customers we make custom endpoints. If you are in the need of a custom endpoint, [let us know](#).
