CORS and JSONP

We have support for JSONP and CORS. Here are two examples with jQuery:

```
$.ajax({ url: "https://simpleanalytics.com/simpleanalytics.com.json?
callback=?", dataType: "jsonp", success: function (data) { console.log(data);
}, }); $.ajax({ url: "https://simpleanalytics.com/simpleanalytics.com.json",
success: function (data) { console.log(data); }, });
```

We append the `Access-Control-Allow-Origin` -header with the `*` -value , so any modern browser should accept the request without any effort.
